

62510 Master of Information Technology (coursework)

Administrative details

School	Physics, Mathematics and Computing
Board Of Studies	Mathematical and Physical Sciences
Responsible Organisational Entity	Physics, Mathematics and Computing
School Collaborations	{"School Collaborations" blank}
Coordinator	Professor Amitava Datta {00033579}
Availability of course for 2026	Available for new enrolments

Details

Course code	62510
Title	Master of Information Technology
Award Title	Master of Information Technology
Abbreviation of award	MIT
Type of degree course	Master's by Coursework
AQF course type and level	Master's (Coursework) — Level 9
Structure type	Generic
CRICOS code	083866G
About this course	This course provides its graduates with the necessary knowledge and skills to explain and apply appropriate information technology (IT) methodologies to help an individual or organisation achieve its goals and objectives. Students also learn to appreciate the scientific foundations on which IT are built, and to anticipate the changing direction of IT and evaluate and communicate the effectiveness of new technologies. Read more about each specialisation and their program level outcomes. This program is accredited by ACS for quality, career enablement and compliance with ACS and international Seoul Accord graduate standards. The Master of Information Technology (62510) is accredited by the Australian Computer Society (ACS).
Approved	25/06/2014
First year of offer	2015

Volume of learning

Maximum volume of learning	96 points
Minimum volume of learning	72 points
Does minimum volume of learning correspond to standard admission requirements?	Yes

Field of Education

Broad Field of Education	02 - Information Technology
Narrow Field of Education	0200 - Information Technology

Overview

Overview of the proposed course

{"Overview of the proposed course" blank}

Why offer the proposed course

Rationale for offering course

The former Master of IT course was rescinded in 2011 as it didn't align with the requirements of New Courses and it is recognised that there is a market for Cycle 2 programs in this field.

The Faculty has received feedback from the International Centre that there is a strong demand for a Master of IT in the international market, specifically in South Asia and China.

Course availability for students

Course offered to student categories

Commonwealth supported; International students (student visa holders);

Consultation with Strategy Planning and Performance regarding Commonwealth Supported Places

Has been confirmed.

Rules

Applicability of the Student Rules, policies and procedures

1.(1) The Student Rules apply to students in this course.

(2) The policy, policy statements and guidance documents and student procedures apply, except as otherwise indicated in the rules for this course.

Academic Conduct Essentials and Communication and Research Skills modules

2.(1) A student who enrolls in this course for the first time irrespective of whether they have previously been enrolled in another course of the University, must undertake the Academic Conduct Essentials module (the ACE module) and the Communication and Research Skills module (the CARS module).

(2) A student must successfully complete the ACE module within the first teaching period of their enrolment. Failure to complete the module within this timeframe will result in the student's unit results from this teaching period being withheld. These results will continue to be withheld until students avail themselves of a subsequent opportunity to achieve a passing grade in the ACE module. In the event that students complete units in subsequent teaching periods without completing the ACE module, these results will similarly be withheld. Students will not be permitted to submit late review or appeal applications regarding results which have been withheld for this reason and which they were unable to access in the normally permitted review period.

Admission rules - English language competency requirements

3. To be considered eligible for consideration for admission to this course an applicant must satisfy the University's English language competence requirement as set out in the [University Policy on Admission: Coursework](#).

Admission rules - admission requirements

4. To be considered for admission to this course an applicant must have—

(a) a bachelor's degree, or an equivalent qualification, as recognised by UWA;

and

(b) the equivalent of a UWA weighted average mark of at least 65 per cent;

and

(c) completed Mathematics Methods ATAR, or equivalent, as recognised by UWA.

Admission rules - ranking and selection

5. Where relevant, admission will be awarded to the highest ranked applicants or applicants selected based on the relevant requirements.

Articulation and Exit Awards

6.(1) This course has the following exit awards:

- 60220 Graduate Certificate in Information Technology (24 points)
- 60320 Graduate Diploma in Information Technology (48 points)

(2) A student who withdraws from the Master of Information Technology course before completing it, but after completing Level 4 and Level 5 units to the value of 24 points, may apply to the School to be awarded the Graduate Certificate in Information Technology.

(3) A student who withdraws from the Master of Information Technology course before completing it, but after completing Level 4 and Level 5 units to the value of 48 points, may apply to the School to be awarded the Graduate Diploma in Information Technology.

Course structure	7.(1) The course consists of units to a total value of 96 points (maximum value) which includes conversion units to a value of 24 points, course core units and specialisation units. The course comprises the following specialisations : SP-APCMP Applied Computing SP-ARTIN Artificial Intelligence SP-SOFSY Software Systems (2) Units must be selected in accordance with the course structure, as set out in these rules. (3) Students who have completed a bachelor's degree with a major in a cognate area, or equivalent as recognised by the Faculty are granted credit for conversion units up to a value of 24 points.
Satisfactory progress rule	8. To make satisfactory progress a student must pass units to a point value greater than half the total value of units in which they remain enrolled after the final date for withdrawal without academic penalty. 9. A student who has not achieved a result of Ungraded Pass (UP) for the Communication and Research Skills module (the CARS module) when their progress status is assessed will not have made satisfactory progress even if they have met the other requirements for satisfactory progress in Rule 8.
Progress status	10.(1) A student who makes satisfactory progress in terms of Rule 8 is assigned the status of 'Good Standing'. (2) Unless the relevant board determines otherwise because of exceptional circumstances— (a) a student who does not make satisfactory progress for the first time under Rule 8 is assigned a progress status of 'On Probation'; (b) a student who does not make satisfactory progress for the second time under Rule 8 is assigned a progress status of 'Suspended'; (c) a student who does not make satisfactory progress for the third time under Rule 8 is assigned a progress status of 'Excluded'. 11. A student who does not make satisfactory progress in terms of Rule 9 is assigned the progress status of 'On Probation', unless they have been assigned a progress status of 'Suspended' or 'Excluded' for failure to meet other satisfactory progress requirements in Rule 8.
Award with distinction rule	12. To be awarded the degree with distinction a student must achieve a course weighted average mark (WAM) of at least 80 per cent which is calculated based on— (a) all units above Level 3 attempted as part of the course that are awarded a final percentage mark; (b) all relevant units above Level 3 undertaken in articulating courses of this University that are awarded a final percentage mark; and (c) all units above Level 3 completed at this University that are credited to the master's degree course.
Deferral	13. Applicants awarded admission to the course are entitled to a deferral of up to 12 months, as per the University Policy on: Admissions (Coursework).
Additional rule(s)	14. Specialisations Students may complete a maximum of two specialisations in this course, excluding the Applied Computing specialisation. Students taking the Applied Computing specialisation may complete only one specialisation.

Course structure

 Students who have completed degree studies in a non-cognate area, or equivalent as recognised by the School, must complete relevant conversion units up to the value of 24 points as determined by the School upon offer of admission and by the scope of a student's prior study. Students choose either CITS2002 or CITS2005.			
CITS1003	Introduction to Cybersecurity	6 points	✔ Active
CITS1401	Computational Thinking with Python	6 points	✔ Active
CITS1402	Relational Database Management Systems	6 points	✔ Active
CITS2002	Systems Programming	6 points	✔ Active
CITS2005	Object Oriented Programming	6 points	✔ Active

 Take all units (24 points):			
CITS4401	Software Requirements and Design	6 points	✓ Active
CITS5206	Information Technology Capstone Project ★	6 points	✓ Active
CITS5505	Agile Web Development	6 points	✓ Active
PHIL4100	Ethics and Critical Thinking	6 points	✓ Active

 Group A: Take unit(s) to the value of at least 6 points from group A:			
Note: Take units to a total of 24 points from groups A, B and C. Students in the Software Systems Specialisation do not require units from group A			
CITS5503	Cloud Computing	6 points	✓ Active
CITS5506	The Internet of Things	6 points	✓ Active

 Group B: Take unit(s) to the value of at least 6 points from group B including at least 6 points of level 5 units.			
Note: Take units to a total of 24 points from groups A, B and C.			
CITS4009	Fundamentals of Data Science	6 points	✓ Active
CITS4012	Natural Language Processing	6 points	✓ Active
CITS4402	Computer Vision	6 points	✓ Active
CITS4403	Computational Modelling	6 points	✓ Active
CITS4404	Artificial Intelligence and Adaptive Systems	6 points	✓ Active
CITS4407	Open Source Tools and Scripting	6 points	✓ Active
CITS4419	Mobile and Wireless Computing	6 points	✓ Active
CITS4505	Human Aspects of Cybersecurity	6 points	✓ Active
CITS5014	Data and Information Technologies Research Project Part 1	6 points	✓ Active
CITS5015	Data and Information Technologies Research Project Part 2	6 points	✓ Active
CITS5017	Deep Learning	6 points	✓ Active
CITS5501	Software Testing and Quality Assurance	6 points	✓ Active
CITS5504	Data Warehousing	6 points	✓ Active
CITS5507	High Performance Computing	6 points	✓ Active
CITS5508	Machine Learning	6 points	✓ Active

 Group C: Take units to the value of at most 12 points from group C:			
Note: Take units to a total of 24 points from groups A, B, and C.			
AUTO4508	Mobile Robots	6 points	✓ Active
ENVT4411	Geographic Information Systems Applications	6 points	✓ Active
INMT5518	Supply Chain Analytics	6 points	✓ Active
INMT5526	Business Intelligence	6 points	✓ Active
MGMT5504	Data Analysis and Decision Making	6 points	✓ Active
SVLG5001	McCusker Centre for Citizenship Internship	6 points	✓ Active

Applied Computing specialisation

 Applied Computing Specialisation: Take unit(s) to the value of 24 points from this group including at least 12 points of level 5 units.			
CITS4009	Fundamentals of Data Science	6 points	✔ Active
CITS4012	Natural Language Processing	6 points	✔ Active
CITS4402	Computer Vision	6 points	✔ Active
CITS4403	Computational Modelling	6 points	✔ Active
CITS4404	Artificial Intelligence and Adaptive Systems	6 points	✔ Active
CITS4407	Open Source Tools and Scripting	6 points	✔ Active
CITS4419	Mobile and Wireless Computing	6 points	✔ Active
CITS5017	Deep Learning	6 points	✔ Active
CITS5501	Software Testing and Quality Assurance	6 points	✔ Active
CITS5503	Cloud Computing	6 points	✔ Active
CITS5504	Data Warehousing	6 points	✔ Active
CITS5506	The Internet of Things	6 points	✔ Active
CITS5507	High Performance Computing	6 points	✔ Active
CITS5508	Machine Learning	6 points	✔ Active

Artificial Intelligence specialisation

 Take all units (24 points):			
CITS4012	Natural Language Processing	6 points	✔ Active
CITS4404	Artificial Intelligence and Adaptive Systems	6 points	✔ Active
CITS5017	Deep Learning	6 points	✔ Active
CITS5508	Machine Learning	6 points	✔ Active

Software Systems specialisation

 Take all units (24 points):			
CITS5501	Software Testing and Quality Assurance	6 points	✔ Active
CITS5503	Cloud Computing	6 points	✔ Active
CITS5506	The Internet of Things	6 points	✔ Active
CITS5507	High Performance Computing	6 points	✔ Active

★ marks a capstone (unique) unit.

Mapping of outcomes

Outcomes mapping document URL <https://uniwa.sharepoint.com/sites/curriculummapping/SitePages/Home.aspx>

Specialisation: Applied Computing [SP-APCMP]

Code	SP-APCMP
Title	Applied Computing
About this specialisation	The Applied Computing specialisation provides its graduates with the necessary knowledge and skills to explain and apply appropriate information technology (IT) methodologies to help an individual or organisation achieve its goals and objectives. Students also learn to appreciate the scientific foundations on which IT are built, and to anticipate the changing direction of IT and evaluate and communicate the effectiveness of new technologies.

Specialisation-specific outcomes	Knowledge and skills to explain, evaluate and apply a broad range of information technology (IT) methodologies.
---	---

Specialisation: Artificial Intelligence [SP-ARTIN]

Code	SP-ARTIN
Title	Artificial Intelligence
About this specialisation	The Artificial intelligence specialisation will equip you with skills and knowledge to understand, evaluate, design and implement artificial intelligence systems. Working alongside inspiring researchers and industry, you'll get hands-on practice in a variety of contemporary artificial intelligence techniques, from machine learning and deep learning to natural language processing and adaptive systems that can learn from, and adapt to, a changing and unknown environment. You will develop in-demand skills and leadership qualities for an exciting career in AI.
Specialisation-specific outcomes	acquire the skills and knowledge to understand, evaluate, design and implement artificial intelligence systems

Specialisation: Software Systems [SP-SOFSY]

Code	SP-SOFSY
Title	Software Systems
About this specialisation	The Software Systems specialisation provides its graduates with the necessary knowledge and skills to design and construct software systems focussing on the effective use of modern software deployment frameworks including cloud, internet of things and high-performance computing platforms.
Specialisation-specific outcomes	Design and construct software systems using modern software deployment frameworks including cloud, internet of things and high-performance computing platforms

Exit awards

Exit award #1

Code	60220
Title	Graduate Certificate in Information Technology
Type	Graduate Certificate
Abbreviation	GradCertIT
Points	24
Requirements	A student who withdraws from the Master of Information Technology course before completing it, but after completing Level 4 and Level 5 units to the value of 24 points, may apply to the School to be awarded the Graduate Certificate in Information Technology
Outcomes	The learning outcomes will be the same for the units completed; however it is recognised that students will achieve lower level skills as compared to "Outcomes & Australian Qualifications Framework"
Summary of assessment	The assessment practices will be the same as the MIT for the four units that are completed.

Exit award #2

Code	60320
Title	Graduate Diploma in Information Technology
Type	Graduate Diploma
Abbreviation	GradDiplIT
Points	48
Requirements	A student who withdraws from the Master of Information Technology course before completing it, but after completing Level 4 and Level 5 units to the value of 48 points, may apply to the School to be awarded the Graduate Diploma in Information Technology
Outcomes	The learning outcomes will be the same for the units completed; however it is recognised that students will achieve lower level skills as compared to "Outcomes & Australian Qualifications Framework"
Summary of assessment	The assessment practices will be the same as the MIT for the eight units that are completed..

Australian Qualification Framework outcomes

AQF outcomes: Knowledge

Graduates will be able to:

- (a) demonstrate a detailed knowledge of contemporary information technologies, including those for software development, data collection and analysis, internet-based applications, and software project management.
- (b) explain how foundational concepts have led to the design and implementation of contemporary information technologies.
- (c) understand ethical issues and professional responsibility in IT projects.

AQF outcomes: Skills

Graduates will be able to:

- (a) develop significant computer programs in several contemporary programming languages.
- (b) apply logical and critical thinking skills to harness existing computing technologies to manage and analyse real world problems.
- (c) effectively communicate verbally, in writing, and other modes of communication with team members, leaders and industry experts.
- (d) understand and apply the principles of software project planning and management in different application domains.

AQF outcomes: Application of knowledge and skills

Graduates will be able to:

- (a) identify and discuss emerging information technologies and their potential application to a wide variety of problems.
- (b) select from and apply appropriate software development models and data representation and analysis techniques.
- (c) identify the trade-offs to be considered when planning a new software project, using a combination of new and existing components, on a variety of platforms.

Accreditation

Accreditation body	Specialisation	Requirements	Benefits for students	Review cycle	Last approval date	Next renewal date	Contact information for body	Contact information in UWA
Australian Computer Society (ACS)		The Master of Information Technology is Accredited by the Australian Computer Society (ACS) at the Professional Level.	The Australian Computer Society (ACS) is the association for Australia's information and communications technology (ICT) profession. It represents all ICT practitioners in business, government and education. The ACS accreditation is through the Seoul Accord. This means the degree will be recognised within the signatories of the Accord, this includes Korea (ABEEK), United States of America (ABET), Australia (ACS), United Kingdom (BCS), Canada (CIPS), Hong Kong (HKIE), Taiwan (IEET) and Japan (JABEE).		19-11-2021	20-11-2025	Ernie Jauwan, Accreditation Manager (T) 02 8296 4408 (Mon-Wed) (E) ernie.jauwan@acs.org.au Dr Paul O'Brien, ACS Accreditation Case Manager (T) 0468 557 470 (E) paul.o'brien@acs.org.au	Effective up to and including academic year entry 2025.

Course delivery

Course delivery with other schools

School	Contribution
S00120 Humanities	PHIL4100 critical thinking. New core unit developed for this program
S00420 UWA Business School	Option units as per existing MIT
S00705 Agriculture and Environment	Option unit ENVT4411 as per existing MIT
S00660 Engineering	Option units as per existing MIT. Engineering agreed with removing GENG5505 from core.
S00140 Psychological Science	Ongoing discussions regarding possible inclusion of PSYC option units
N00000 External Units (Not Attached to a School)	McCusker Centre for Citizenship Internships offered as option service learning unit for MIT/MDS

Mode of delivery

Internal

Location(s) delivered

Location	Percentage
UWA (Crawley)	100%

Duration, intake and attendance

Duration of course 1.5 years

Duration of course at maximum volume of learning 2 years

Intake periods (broad) Beginning of year and mid-year

Intake periods (specific teaching periods) Semester 1, Semester 2

Attendance type Full- or part-time

Time limit 5 years

Consultations

Schools consulted

Area	Representative	Outcomes	Response
School of Engineering	Dianne Hesterman	Address concerns for MIT students struggling with an engineering project management unit during their first 2 semesters. Email discussions Feb 2024.	Remove GENG5505 from MIT core. Other Eng option units are as per the existing MIT
School of Humanities	Lachlan Umbers	Proposal of a new core unit on ethics and critical thinking. Discussed Dec 2023 to Feb 2024.	Consultation on a new unit PHIL4100 on critical thinking, communication and ethics.
McCusker Centre for Citizenship Internships	Catherine Martin	Meeting 2/4/2024 to discuss adding service learning unit as an option. Inclusion of an internship unit option was also recommended in the 2020 ACS accreditation review and UWA MIT review	SLVG5001 added to MIT options

History and committee endorsements/approvals

Event	Date	Outcome
 Faculty	16-05-2014	Endorsed: Faculty Board R35/2014 Approval reference: http://www.ecm.uwa.edu.au/staff/committees/faculty-board
 Pro Vice-Chancellor (Academic)	10-06-2014	Endorsed: Endorsed and recommend to Academic Council for approval Approval reference: Executive Officer, Board of Coursework Studies
